## 2 Feature Overview

### PL-Version      Changes

<b>1.0.0</b>	ILIAS Repository-Object-Plugin for Foto-Galleries <ul style="list-style-type: none"> <li>• Create multiple albums</li> <li>• Upload photos with drag&amp;drop</li> <li>• Download multiple fotos as zip</li> <li>• Fullscreen presentation</li> </ul>
<b>2.0.0</b>	Support for ILIAS 5
<b>2.1.0</b>	<ul style="list-style-type: none"> <li>- New right for download images separated from view</li> <li>- Fixes some bugs with ListView</li> <li>- Fixes some bugs during installation</li> <li>- Fixes some bugs in permission checks</li> <li>- Download complete album</li> <li>- Download of one image doesn't generate ZIP-File</li> </ul>

## 3 Installation

Start at your ILIAS root directory

```
mkdir -p Customizing/global/plugins/Services/Repository/RepositoryObject/  
cd Customizing/global/plugins/Services/Repository/RepositoryObject/  
git clone https://github.com/studer-raimann/PhotoGallery.git
```

As ILIAS administrator go to "Administration->Plugins" and install/activate the plugin.

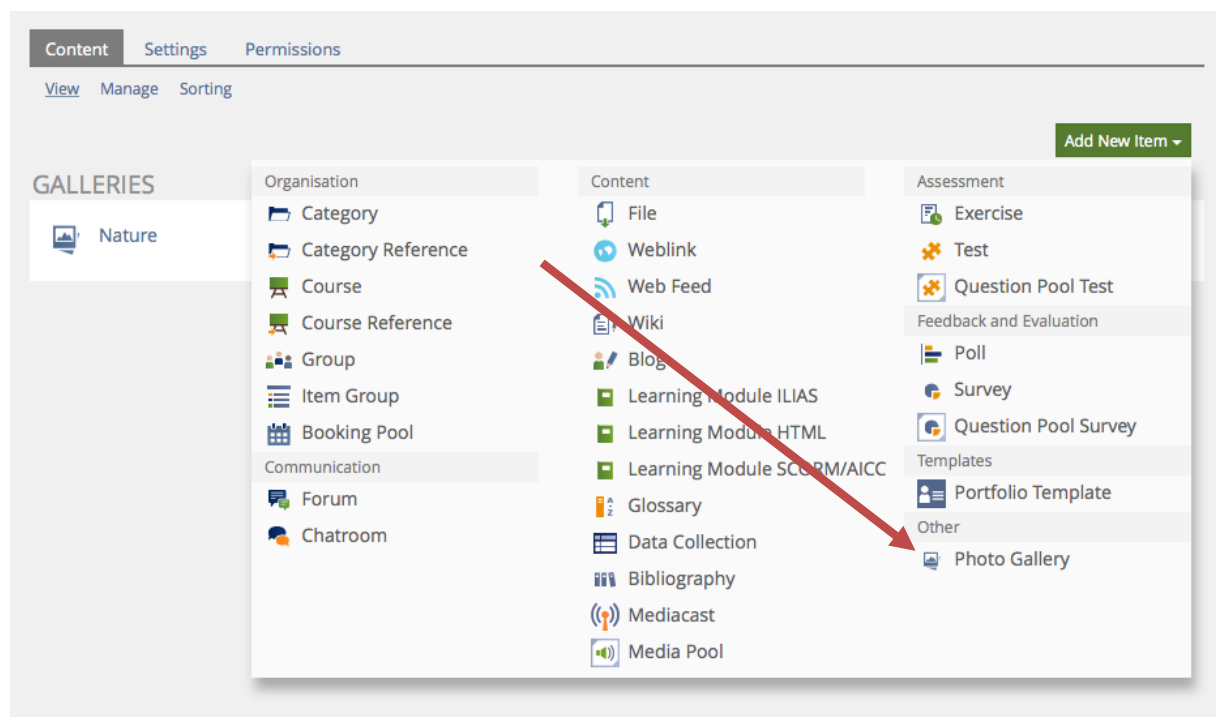

### 3.1 Installation in ILIAS 4.4

ILIAS 4.4 does not include ActiveRecord. Therefore please install the latest Version of ActiveRecord before you install the plugin: Start at your ILIAS root directory

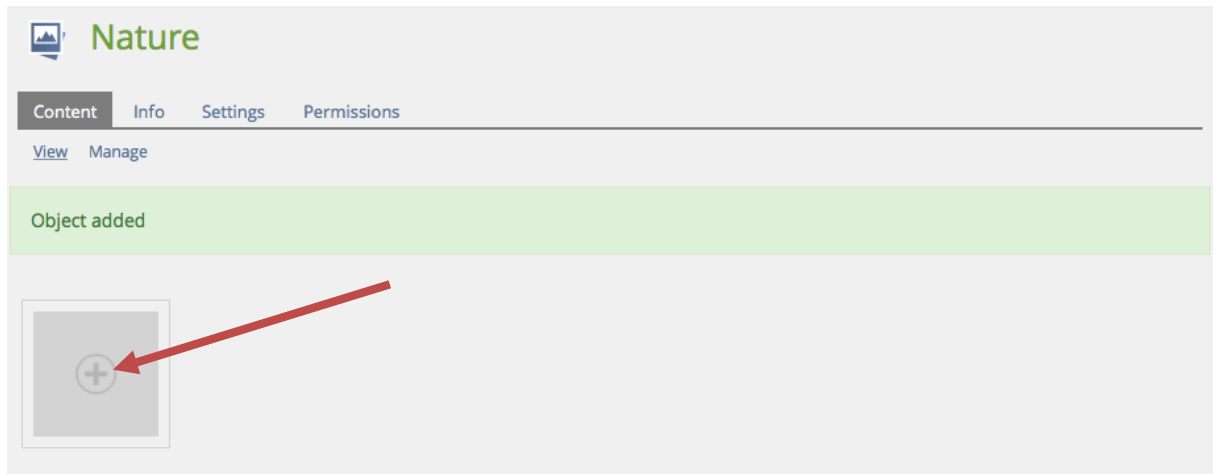

```
mkdir -p Customizing/global/plugins/Libraries/  
cd Customizing/global/plugins/Libraries  
git clone https://github.com/studer-raimann/ActiveRecord.git
```
